SDF: Issues

editorial

Make abstract a bit less focused on OneDM editorial #68
→ @akeranen

Usage of top-level affordances and sdfData editorial #63

chores

Do the line-breaking task #54

Add automated checks task #33
(probably have enough checks, just not automated in commit)

examples

Examples for SDFpointers to input/output parameters task #60

future-proof namespaces

Don't put colons into given names (named<...>) or quality names #67

Contribute to more than the default namespace? #28

thing/object issue

Should we suggest a conventional name for an sdfObject that goes into an sdfThing that otherwise aggregates other sdfThings? has PR #62

Allow affordances at the sdfThing level? has PR #56

→ Align sdfObject and sdfThing PR#66

grammar issue

Split up jsonschema CDDL definition (co-occurrence) — waiting for tool update #34

really sdf.next

Define "version" field in info block 1.next #29 ???

Rules for combining information from info blocks 1.next #26

When do we use "sdfXxx", when do we use "xxx"? SDF evolution #11
